partner programme today**

# 01. Partner Introduction

EMS Renewables presents the ECO Grant Scheme:  
Fully funded Heating and Insulation Grants  
sourced from the Government's ECO Scheme.

What is the ECO Scheme? The ECO Scheme, also known as the Energy Companies Obligation, was initiated by the Government in 2013 and is currently in its fourth phase, ECO4, which commenced in April 2022 and is scheduled to continue until March 2026.

ECO Scheme Grants offer financial support for installing energy-efficient heating and insulation systems for households facing fuel poverty.

At EMS Renewables, your role involves introducing properties for free upgrades of Multiple Energy Saving Measures in targeted areas. These measures empower individuals to save significantly on their escalating energy bills, and the best part is, this service comes at absolutely NO COST to the homeowner, tenant or landlord. They are typically eager to embrace these improvements if their property qualifies for free grants.

## Details:

- **Location:**  
Nationwide
- **Target Markets:** If a home has a low energy rating and uses energy, they are a potential customer.
- **Deal Size:**  
Uncapped
- **Sales Type:**
